

**STEP 1. Specify Actuators**

**A** Specify one actuator per window of **less** than 900mm.

317037

**B** Specify two actuators per window of **more** than 900mm.

317037

Specify one synchronisation loom per window of **more** than 900mm.

317051

Total number of actuators **A** + **B** =

Total number of synchronisation loom =

**STEP 2. Specify Control Type - Keypad or Wall Switch**

Two keypads maximum per network.

317038

**Note:** The number of devices able to be connected to a single network is limited. For further details, please visit [www.lockweb.com.au/elevation](http://www.lockweb.com.au/elevation)

Every wall switch requires a network adaptor. Four network adaptors max per network.

317040

**Note:** Functionality is limited when using a wall switch.

**STEP 3. Specify Rain Sensors**

Up to four rain sensors per network.

317039

**Note:** Each rain sensor includes a network adaptor.

**STEP 4. Specify Power Supply**

You will require one power supply for each actuator, keypad or sensor.

317053

**Note:** An Electrician may opt to use their own power supply system, particularly with larger networks. If unsure, please consult an Electrician first.
