

PRODUCT BULLETIN No. 198
Urban 582 Awning Internally Beaded Sash
Residential - Commercial

Capral is committed to providing its customers with market leading Window & Door systems. So that we may concentrate on providing you the best stocked service offer, we periodically review our product offer and engineer ways to enhance and/or align our suites.

With the increase in Double Glazing, with larger and heavier glass sizes, Capral is introducing an Internally Beaded 60mm sash.

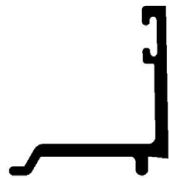

This sash will suit both Awning & Casement configurations in the Urban 582, AGS 382/482 Awning suites. With no change to existing outer frames or sash adaptors.

This sash allows frames and sashes to be fabricated and installed and the glass then fitted on site much easier. This sash takes both Double & Single glazed options u to 18mm

<p><u>Extrusion No.</u> : EP17160</p> <p><u>Description:</u> Internally Beaded Top Rail</p> <p><u>Paint Perimeter:</u> 168mm</p> <p><u>Anodised Perimeter:</u> 251mm</p>	<p><u>Extrusion No.</u> : EP17161</p> <p><u>Description:</u> Internally Beaded Rail</p> <p><u>Paint Perimeter:</u> 165mm</p> <p><u>Anodised Perimeter:</u> 225mm</p>

BUILDING SYSTEMS

The new Sash uses the following existing beads, components and an additional Glass Setting Block

EL9447
GLAZING BEAD

EU8857
23mm BEAD

EL9448
19mm BEAD

Tooling

Any new Urban 582 Awning tooling (MC90523) received in 2018 will accept this sash as standard. Customers with existing Comall tooling will need an update kit, which can be fitted by the fabricator. Please contact the undersigned for more information.

Technical Documentation and Software Support

These sections will be documented in next Technical Data manual releases.

With the software packages being updated in the next update releases .

Please contact your local Capral representative for further information.

Kind regards

Matthew Finnie
