

PRODUCT BULLETIN No. 205

2017 – TEST REPORT SUMMARY DOCUMENTS

Commercial & Residential

The annual update has been made to the Capral Test Report Summary documents listing all the additional test results that have been conducted during the past 12 months. These updated summaries are now available from your Account Manager.

There are four summary documents:

- Commercial Structural (wind & water)
- Commercial Acoustic
- Residential Structural (wind & water)
- Residential Acoustic
- Schüco Structural (wind & water)
- Schüco Acoustic

These documents may be used to assess whether a product is suitable for a particular project if the technical data and span tables do not provide enough information to make an appropriate assessment.

Should you require more detailed information than that contained in the summary document, you can receive further guidance from our Technology Solutions Group via your Account Manager.

Please contact your local Capral representative for further information.

Kind regards

Matthew Finnie
