

The Urban Plus Range Sliding Window

Easy to operate and timeless in design, Sliding Windows are an economical choice. Wide panels with no external projections means they are ideal for high traffic areas whilst providing good ventilation. Urban Plus Sliding Windows are available in various sized frames and can seamlessly integrate with doors, awning and fixed windows. Insect screening is included as a standard requirement.

The Urban Plus Sliding Window

The Urban Plus Sliding Window features a substantial 125mm framing system to provide the strength and performance required in high-end architectural applications. The inherent strength of this system allows for large semi-commercial configurations whilst still delivering a residential aesthetic, not possible with commercial systems.

This system features even sight lines between fixed and sliding sashes. Strengthened interlocks feature gently rounded profiles to match the Urban Plus Sliding Door for a consistent look. Capable of accommodating large high performance double glazing and able to achieve single sashes of up to 1800mm in height, the Urban Plus Sliding Window represents a class of its own in respect to style and performance.

Features and Benefits:

- Premium quality 125mm architectural framing system
- Large capacity single and double glazing options
- Height adjustable sash panels
- Capable of sash heights up to 1800mm
- XO, XOX and OXXO configurations with provisions for high and side lights
- Twin point latch or lockable latch options
- Integrated insect and security screening options
- Exclusively designed components to improve the systems performance and function.
