

PRODUCT BULLETIN No. 230
AGS 419 – 100mm Split Corner Mullion
Commercial

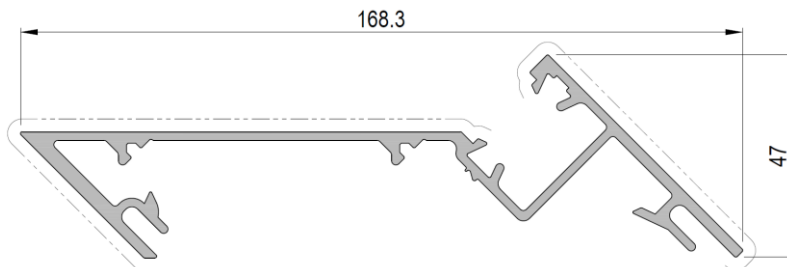

Capral is pleased to announce the addition of a new coupled corner for the 419 -100mm Single and Double Glazed frames. These have been designed to allow a split corner mullion while still utilising the same seals, gaskets and wedges currently used in the system.

A unique feature of this design is that it still allows for thermal expansion and also minor level adjustment.

Technical Notes

Technical Manuals are currently being updated and will be published for download from the Capral website in due course.

These new sections have been added into Capral's software estimation packages.

These extrusions are now stocked in our Campbellfield Melbourne facility.

Please contact your local Capral representative for further information.

Kind regards,

Matthew Finnie

National Window & Door Systems Manager
