

PRODUCT BULLETIN No. 247
Security Product Reference Codes
Security Screens

We have commenced a project in Capral where we will be updating the range of Security Material Descriptions and introducing easily identified Product Reference Codes.

The aim is to of these Product Reference Codes is to:

- Make product identification and selection easier for Capral Security customers
- Allowing Capral Customer Service staff to be able to search quicker for product requests over the phone
- Easily link 'Frames' and 'Corner Stakes' together
- Group Sections together i.e. (Intrudaguard, SupaScreen, FlyScreens etc.)
- Simplify Price Lists in future – (project currently underway)

You may notice some minor changes on product descriptions on future delivery dockets and invoices. Capral Security Technical Manuals and Software will also be updated as apart of a roll out process.

We will be releasing a Security Wall Chart with the new code references. A digital version will be available early August. Examples of the Product Reference Codes can be found on the next page.

Kind regards,

Jack Ryan
