Product Urban Sliding Window Mullion Design Change

Capral would like to advise of a pending design change to the mullions used in the Urban and 380/480 Sliding Windows.

A centre line is being added to the standard (EU6638) and mullion latch (EP13063) mullions to ease fabrication by using the centre line to align the position of the mullion with the head and sill. The centre line will also provide an improved aesthetic by breaking up the wide face of the mullion and improving product symmetry. This will be implemented as a running change meaning that extrusion codes will remain the same and stock of the new design will be introduced as the old design runs out. The old shape will no longer be available.

EU6638 – Urban Sliding Window Standard Mullion	EP13063 – Urban Sliding Window Latched Mullion

These sections work with existing Capral Comall punch tools.

Technical Notes

- Technical Manuals will be updated and published for download from the Capral website & Capral Hub App.
- These updated sections remain available in the Cre8 and Logikal estimation packages.

Please contact your local Capral representative for further information.
