Product Envy Sliding 3-Panel Semi Frameless OBSOLESCENCE

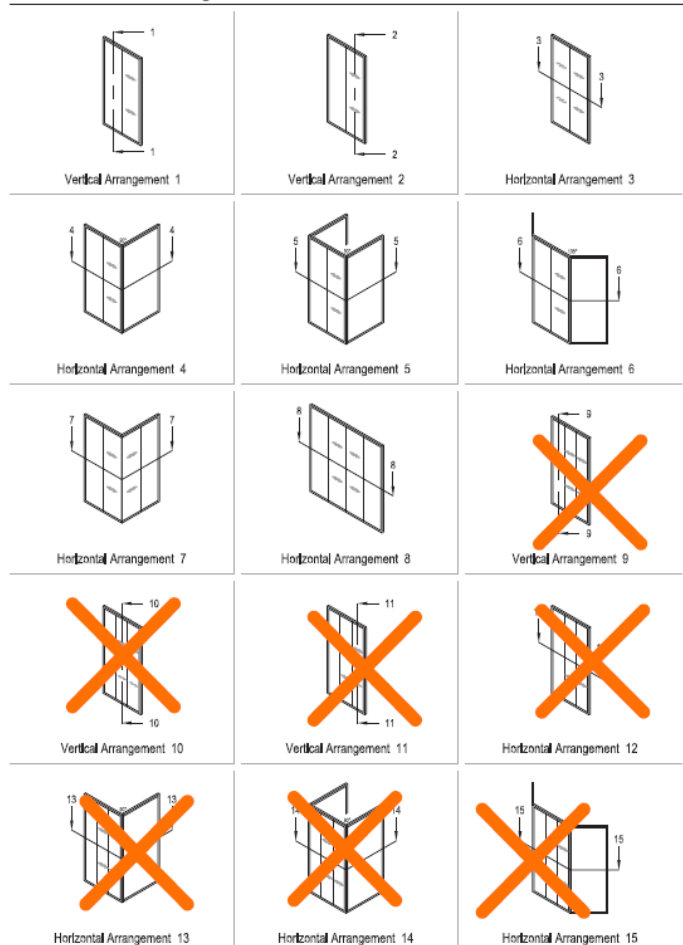

Capral has made the difficult decision that we will be removing the Envy 3-Panel Semi Frameless Slider from our Envy range of shower screens.

This is due to the current difficulties and restrictions impacting the supply of the components that make up the long shaft semi frameless roller (315852 – Envy Roller Semi Frameless Long Shaft Pair).

(SPD03405)

envy Sliding Shower Enclosure
Semi-Frameless Arrangements Not to Scale

Capral will continue to offer the Envy Semi Frameless slider in 2-panel configuration, along with Framed Sliders in both 2- & 3-Panel configurations. We are sorry for any inconvenience this may cause.

A Quocut update will be released to remove this option from the estimation program. Please regularly update your program to ensure it incorporates all system changes and/or improvements.

The Envy Sliding Shower Technical Manual will be updated with this configuration change and be available to download soon.

Please contact either your Capral Account Manager or myself if you wish to discuss any aspect of this change in our product offer.

Regards

Matthew Finnie
