

QUIKLOK

FENCING & SCREENS

CAPRAL
ALUMINIUM

ONE OF THE FASTEST AND SIMPLEST FENCING AND PRIVACY SCREENING SYSTEMS ON THE MARKET.

Capral's unique Quiklok™ grip-spacers, available in either 10mm or 20mm depths, allow you to stack your slat system effortlessly and securely. They are easily adaptable to accommodate different slat heights and can be stacked to increase spacings where required.

They conveniently fill the cavity between the slat and the channel, leaving no sneaky spots for spiders.

With the Quiklok™ Adaptor Channel, you can quickly and easily create corners. You can make a slat fence anywhere the adaptor can be fitted to a secure surface, such as timber, brickwork, and aluminium.

For an aerodynamic look, the Quiklok™ Elliptical Louvre Blade provides a screen with a truly unique style.

FEATURES AND BENEFITS

- **Slat stacking system and concealed fixings** for a streamlined and aesthetically pleasing assembled product.
- **Various slat sizes** are available, including 38mm, 65mm and 100mm heights.
- **Genuine 67mm elliptical louvre blade option** with dedicated End Cap adaptors. Blades overlap at a 140° angle / 50mm pitch providing privacy and ventilation.
- **10mm and 20mm Stacking Spacers** to achieve desired slat spacing.
- **Universal Quiklok™ Adaptor extrusion fits to any secured surface**, enabling the slat system to be attached to any timber, brickwork or aluminium structure where a screen is required. Team with aluminium surround frames to create custom panel modules and gates.
- **Dedicated End Caps for the Quiklok™ Adaptor extrusion** functions to capture the stacked slats and neaten the final appearance of the assembly.
- **End Caps** for terminating 50mm x 50mm posts, creating a professional finish.
- **Spacer Support Tool** available to assist with system manufacture.
- **Dedicated components** are available to achieve square and mitre-cut joints for surround framing.
- **Self-drilling fixings** are specific for slat assembly, requiring no pre-drilling.
- **Quiklok™ components** are produced in a durable UV-stabilised material for long life.
- **Various slat and louvre finishing options**, including anodised, powder-coated colours and timber look.
- **Pattern Stacking** is possible by using different height slats or by adding the look of louvres to top off your Quiklok™ Screen.
- **Multiple applications.** A cost-effective solution for fencing and screening. Use as window screens for shading or privacy, utility enclosures and gates. This system can be either manufactured on-site or at the factory in advance.
