ALUMINIUM SOLUTIONS FOR
**MODULAR
BUILDING**

Local expertise, quality aluminium, national support, and sustainable solutions. Everything modular builders need to build smarter, faster and more sustainably.

The modular building industry is transforming how homes are designed, manufactured, and delivered — and it demands supply partners who understand the pace, precision, and pressures that come with off-site construction. At Capral, we've been supplying aluminium to Australian builders for almost 90 years. Our local manufacturing footprint, reliable distribution network, and versatile product range make us a trusted partner for modular home manufacturers across the country.

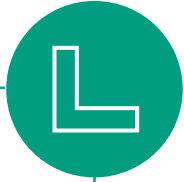

Whether you're building for remote housing, urban infill, or sustainable communities, we deliver aluminium solutions that help streamline your construction process — from frame to finish.

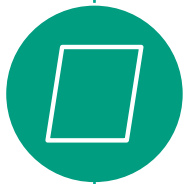

Capral offers a wide range of aluminium products, stocked locally for the modular construction industry.

Standard Extrusions, Angles & Geometrics

Our broad range of stocked extrusions includes angles, channels, t-sections, and more — ready for immediate dispatch from our national distribution network. These versatile profiles are essential for modular builds, offering structural flexibility and compatibility across a wide range of applications.

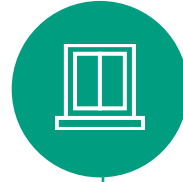

Rolled Products

Capral supplies high-quality aluminium sheet, plate, and coil — ideal for cladding, lining, flashings, and roofing elements. Lightweight, corrosion-resistant, and easy to fabricate, they're a reliable solution for modular home exteriors and interior details.

Custom Extrusion Designs

Need something tailored? Capral offers custom aluminium extrusions designed to your exact specifications. Perfect for modular chassis, framing systems, or integration features — built to support efficient manufacturing, repeatability, and strength.

Window and Door Systems

Engineered for performance and ease of installation, Capral's window and door systems are ideal for modular construction. Available in thermally broken and standard configurations, they meet Australian standards, offer clean modern aesthetics, and integrate seamlessly into pre-fabricated walls.

Security Screens

Capral's Amplimesh® security screen systems provide trusted protection without compromising airflow or visibility. Supported by a national network of manufacturers, Amplimesh® screens are a stylish, secure and smart addition to modular homes — especially in remote or high-risk areas.

Fencing & Screening Solutions

Capral's fencing and screening solutions offer privacy, sun control and style in one durable package. Lightweight, low-maintenance and easy to configure and install, they're ideal for enhancing outdoor spaces in modular homes while supporting functional and aesthetic design goals.

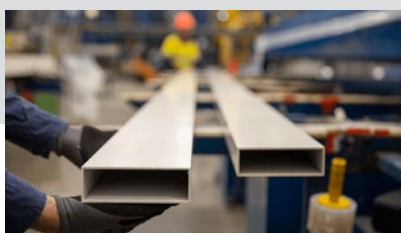

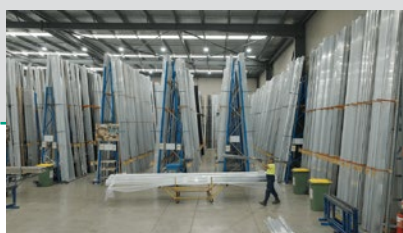

Services that streamline your manufacturing process.

At Capral, we understand that modular construction relies on tight production schedules, minimal downtime, and just-in-time delivery.

Capral's nationwide distribution footprint ensures reliable supply to your manufacturing facility, wherever you're located. With multiple distribution centres across Australia and dedicated account support, we work closely with your team to manage lead times, logistics, and changing demand.

Our in-house technical specialists are available to support your projects from concept to completion. Whether you're navigating compliance requirements, developing new profiles, or looking to optimise materials usage, our experts can provide guidance tailored to the modular environment.

We also offer project-specific fabrication services — including cutting, drilling, and punching — that reduce time and labour on your production line. These value-added services can help you improve speed, reduce waste, and increase installation accuracy in the field.

Flexible Ordering and Nationwide Delivery Options

Capral offers you multiple ways to conveniently source aluminium products and services tailored to your needs:

- Work directly with a **dedicated account manager** who can provide personalised support throughout your project, helping you select the right products and manage timelines
- Visit one of our local **Aluminium Trade Centres** for expert advice, product demonstrations, and fast pick-up.
- Our **online store** is available 24/7 for quick and easy ordering, allowing you to place orders anytime from anywhere. Capral's robust national distribution network ensures fast and reliable delivery direct to your factory or construction site nationwide.

Finishing Options That Fit Your Vision

A high-performance finish doesn't just protect — it elevates. Capral offers in-house powder coating through certified Dulux and Akzo Nobel applicators, giving you access to a wide range of architectural colours and finishes suitable for coastal and inland conditions alike.

Our powder coating services are available nationally and designed to support short lead times — ideal for fast-moving modular build programs.

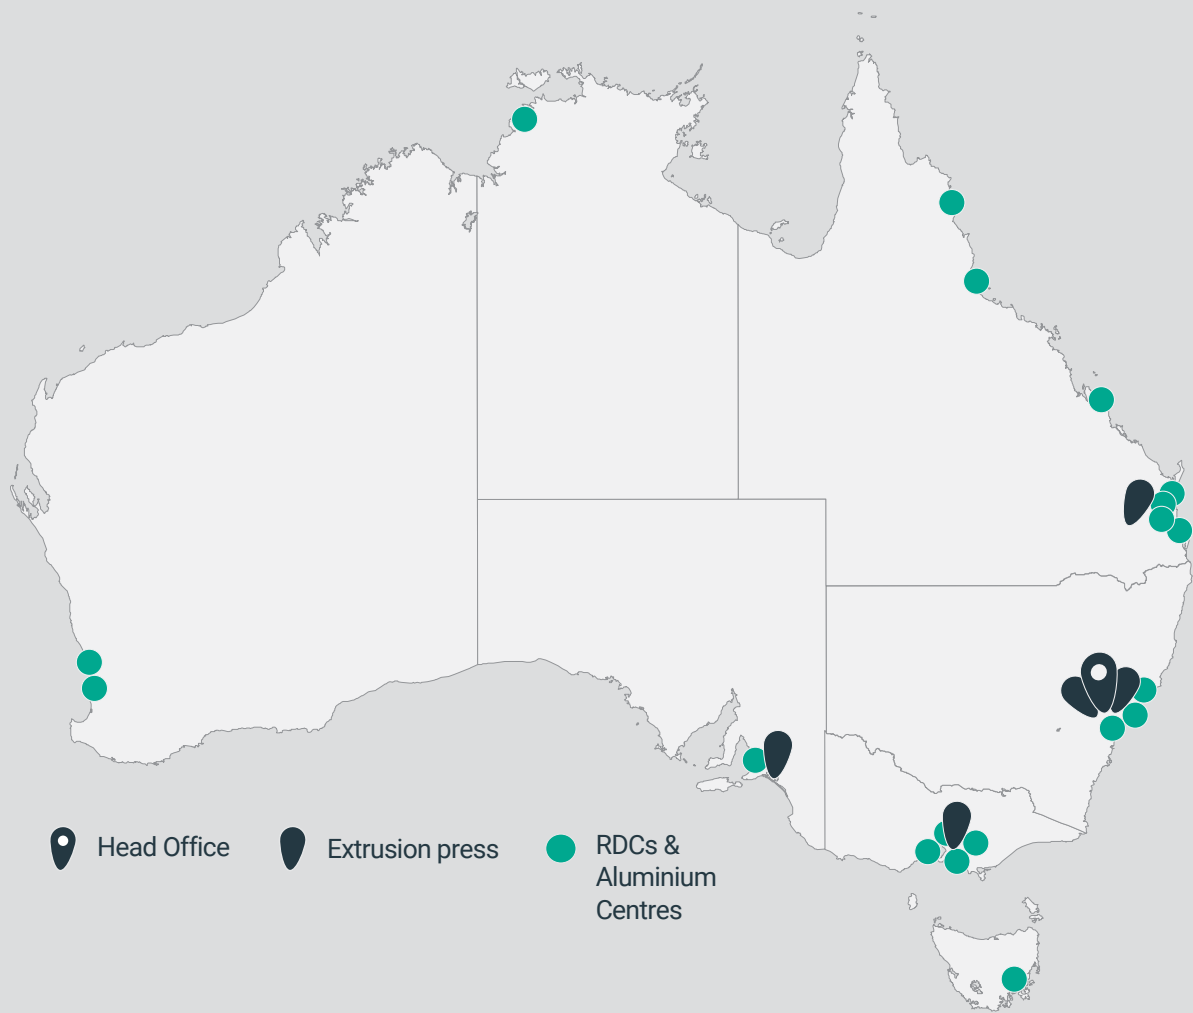

Whether you're aiming for bold colour statements or subtle tones that blend with the natural landscape, we can help you deliver a consistent, high-quality finish every time.

Value-Add Services That Streamline Production

Capral offers a range of in-house value-add services — including cutting, drilling, punching, and CNC machining — designed to support efficient, high-volume modular construction.

By delivering aluminium components pre-processed to your specifications, Capral helps to reduce on-site labour, minimise waste, and accelerate factory production timelines.

Our services are backed by national capability and consistent quality control, ensuring your materials arrive ready for integration.

Lower-carbon Aluminium with LocAl®

Capral's LocAl® range gives modular home builders access to aluminium with a significantly reduced carbon footprint without compromising quality or supply.

It includes two certified options:

- **LocAl® Green:**
Under 8kg CO₂e/kg aluminium
- **LocAl® Super Green:**
Under 4kg CO₂e/kg aluminium

LocAl® enables you to specify lower-carbon aluminium while maintaining consistency across projects. It supports efforts to reduce embodied carbon, meet green certification targets, and align with growing sustainability expectations from clients and regulators.

Certified Sustainability with ASI

Capral is certified to both the ASI Performance and ASI Chain of Custody Standards, demonstrating our commitment to responsible sourcing and sustainable manufacturing.

For modular home builders, this means access to aluminium that is ethically sourced, fully traceable, and aligned with global ESG best practices. ASI-certified materials support green building standards, ESG reporting, and increasing demands for transparency across the construction industry.

By choosing Capral, you're partnering with a supplier whose sustainability credentials are independently verified and whose materials support your project goals and reputation.

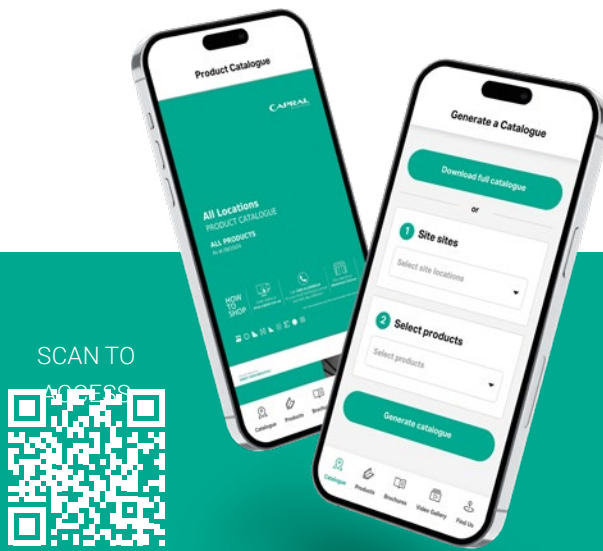

Australian-Made Extrusions

Capral proudly manufactures its aluminium extrusions right here in Australia, supporting local jobs, reliable supply chains, and consistent quality.

For modular home builders, that means dependable lead times, reduced risk of delays, and confidence in compliance with Australian Standards.

Whether you are using standard profiles or custom designs, you can trust that every extrusion is made to perform backed by local expertise and national reach.
