ALUMINIUM SOLUTIONS ^{FOR}
PLAY
GROUND

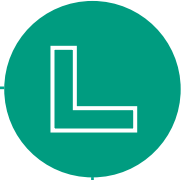

Local expertise, quality fabrication, national support, and sustainable solutions — everything playground designers and manufacturers need to create safer, smarter and more durable play spaces.

The playground industry is evolving with greater focus on safety, durability, and sustainability — and it demands supply partners who understand the creativity, compliance, and precision required to bring play spaces to life. At Capral, we've been supplying aluminium to Australian manufacturers for almost 90 years. Our local manufacturing footprint, reliable distribution network, and versatile product range make us a trusted partner for playground equipment designers and builders across the country.

Whether you're designing for schools, public parks, or community spaces, we deliver aluminium solutions that help you create equipment that is strong, safe, and built to last.

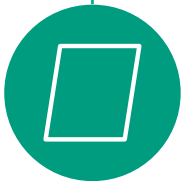

Capral offers a wide range of aluminium products, stocked locally for the playground fabrication industry.

Standard Extrusions, Angles & Tubes

A wide range of stocked profiles — including angles, channels, round and square tubes — ready for immediate dispatch. Perfect for frames, supports, and creative playground structures.

Rolled Products

Aluminium sheet, plate, and coil suitable for cladding, decorative elements, and protective coverings.

Lightweight, corrosion-resistant, and easy to fabricate — ideal for outdoor environments.

Custom Extrusion Designs

Need something unique? Capral can design and extrude custom aluminium profiles tailored to your playground concept — ensuring strength, compliance, and design flexibility.

Surface Finishing Options

Powder coating and anodising options provide colour, style, and durability while withstanding heavy use and harsh weather. Compliant finishes that help keep playgrounds safe and visually appealing.

Compliance & Safety

Capral aluminium products are manufactured to support projects that meet AS/NZS playground safety standards, helping designers and contractors deliver trusted, long-lasting play environments for communities.

Services that streamline your manufacturing process.

At Capral, we understand that playground construction relies on tight production schedules, minimal downtime, and just-in-time delivery.

Capral's nationwide distribution footprint ensures reliable supply to your manufacturing facility, wherever you're located. With multiple distribution centres across Australia and dedicated account support, we work closely with your team to manage lead times, logistics, and changing demand.

Our in-house technical specialists are available to support your projects from concept to completion. Whether you're navigating compliance requirements, developing new

profiles, or looking to optimise materials usage, our experts can provide guidance tailored to playground construction.

We also offer project-specific fabrication services — including cutting, drilling, and punching — that reduce time and labour on your production line. These value-added services can help you improve speed, reduce waste, and increase installation accuracy in the field.

Flexible Ordering and Nationwide Delivery Options

Capral offers you multiple ways to conveniently source aluminium products and services tailored to your needs:

- Work directly with a **dedicated account manager** who can provide personalised support throughout your project, helping you select the right products and manage timelines
- Visit one of our local **Aluminium Trade Centres** for expert advice, product demonstrations, and fast pick-up.
- Our **online store** is available 24/7 for quick and easy ordering, allowing you to place orders anytime from anywhere. Capral's robust national distribution network ensures fast and reliable delivery direct to your factory or construction site nationwide.

Finishing Options That Fit Your Vision

A high-performance finish doesn't just protect — it elevates. Capral offers in-house powder coating through certified Dulux and Akzo Nobel applicators, giving you access to a wide range of architectural colours and finishes suitable for coastal and inland conditions alike.

Our powder coating services are available nationally and designed to support short lead times — ideal for fast-moving projects.

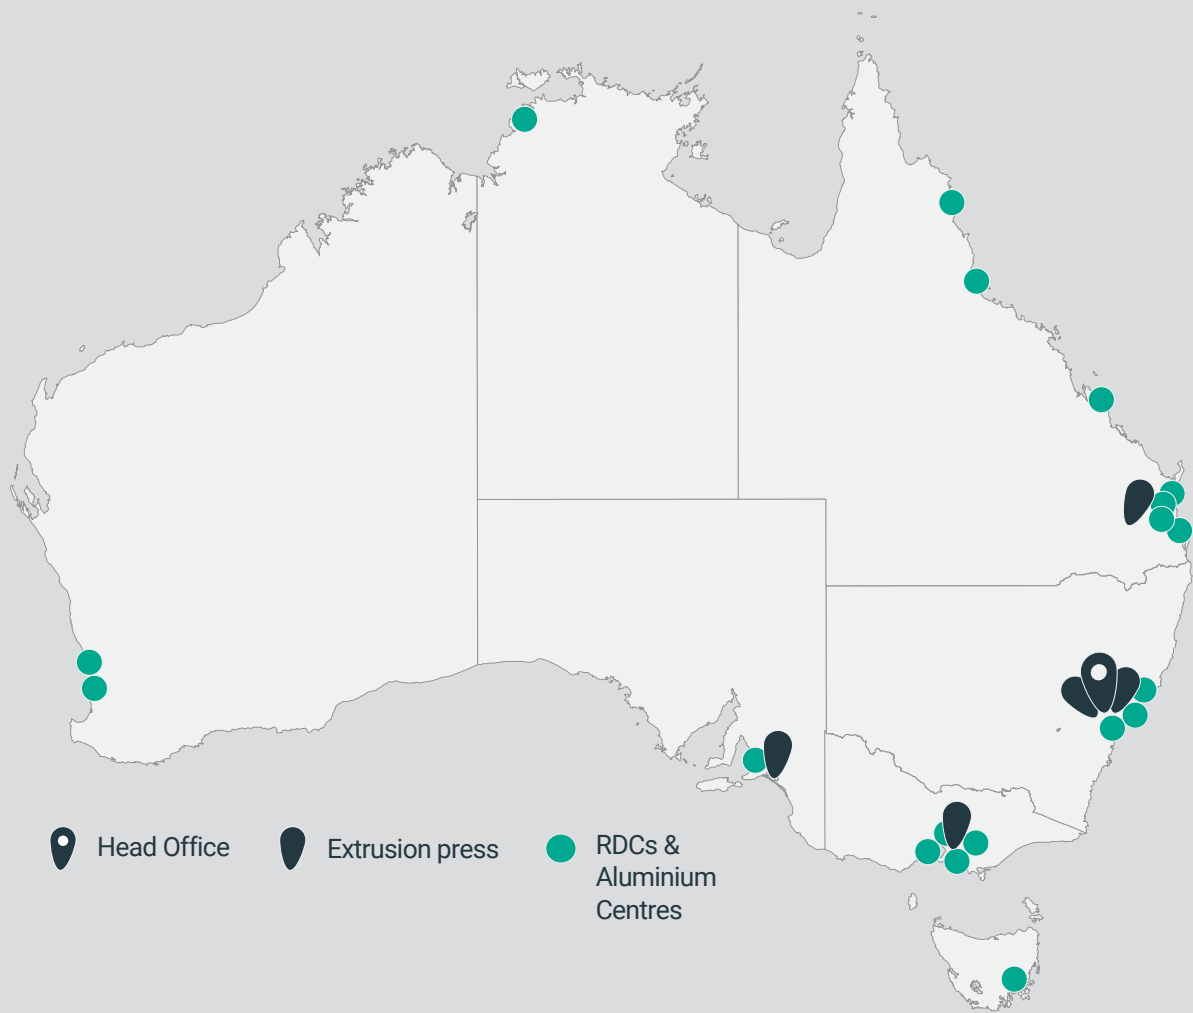

Whether you're aiming for bold colour statements or subtle tones that blend with the natural landscape, we can help you deliver a consistent, high-quality finish every time.

Value-Add Services That Streamline Production

Capral offers a range of in-house value-add services — including cutting, drilling, punching, and CNC machining — designed to support efficiency throughout your projects.

By delivering aluminium components pre-processed to your specifications, Capral helps to reduce on-site labour, minimise waste, and accelerate factory production timelines.

Our services are backed by national capability and consistent quality control, ensuring your materials arrive ready for integration.

Lower-carbon Aluminium with LocAl®

Capral's LocAl® range gives the industry access to aluminium with a significantly reduced carbon footprint without compromising quality or supply.

It includes two certified options for aluminum extrusions:

- **LocAl® Green:**
Under 8kg CO₂e/kg aluminium
- **LocAl® Super Green:**
Under 4kg CO₂e/kg aluminium

LocAl® enables you to specify lower-carbon aluminium while maintaining consistency across projects. It supports efforts to reduce embodied carbon, meet green certification targets, and align with growing sustainability expectations from clients and regulators.

Certified Sustainability with ASI

Capral is certified to both the ASI Performance and ASI Chain of Custody Standards, demonstrating our commitment to responsible sourcing and sustainable manufacturing.

This means access to aluminium that is ethically sourced, fully traceable, and aligned with global ESG best practices. ASI-certified materials support green building standards, ESG reporting, and increasing demands for transparency across the construction industry.

By choosing Capral, you're partnering with a supplier whose sustainability credentials are independently verified and whose materials support your project goals and reputation.

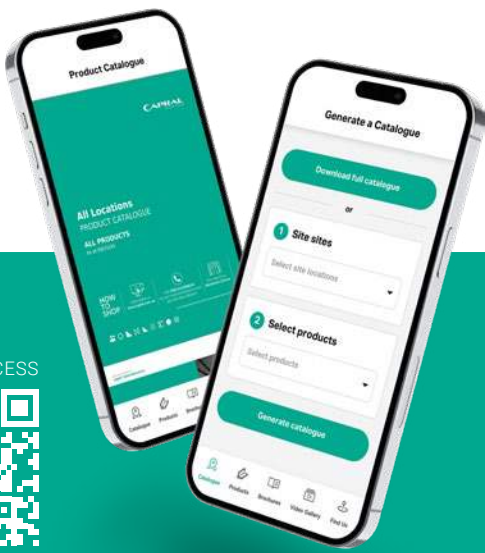

Australian-Made Extrusions

Capral proudly manufactures its aluminium extrusions right here in Australia, supporting local jobs, reliable supply chains, and consistent quality.

This means dependable lead times, reduced risk of delays, and confidence in compliance with Australian Standards.

Whether you are using standard profiles or custom designs, you can trust that every extrusion is made to perform backed by local expertise and national reach.
