

CAPRAL
ALUMINIUM

ALUMINIUM SOLUTIONS FOR
SOLAR
MANUFACTURERS

Local expertise, quality aluminium, national support, and sustainable solutions. Everything solar manufacturers and installers need to build lighter, stronger, and more efficiently.

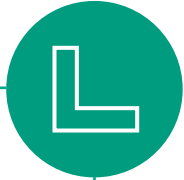

The solar and renewable energy sector is driving Australia's transition to a cleaner future — and it demands materials that combine precision, durability, and sustainability. At Capral, we've been supplying aluminium to Australian manufacturers and builders for almost 90 years. Our local manufacturing capability, dependable distribution network, and versatile product range make us a trusted partner for solar mounting system producers, frame manufacturers, and renewable energy project developers nationwide.

Whether you're building rooftop arrays, large-scale solar farms, or integrated energy solutions, we deliver aluminium products and expertise that help streamline your build process — from structure to finish.

Capral offers a wide range of aluminium products, stocked locally for the solar and renewable energy industry.

Standard Extrusions, Angles & Tubes

Our extensive range of stocked extrusions includes angles, channels, t-sections, and more, these versatile profiles are ideal for solar framing and support structures, providing strength, corrosion resistance, and ease of assembly.

Compliance & Safety

Capral is committed to supporting Australia's renewable energy transition through sustainable aluminium supply. Our LocAl® Green and Super Green lower carbon aluminium options are backed by ASI Chain of Custody Certification and independently verified lifecycle data. With locally extruded and recycled content options, we help reduce embodied carbon in solar infrastructure without compromising quality or performance.

Surface Finishing Options

To meet the durability and aesthetic requirements of solar installations, Capral offers a range of high-performance finishing options, including anodising and powder coating. These finishes provide added corrosion resistance, UV stability, and long-term protection.

Custom Extrusion Designs

Need something tailored? Capral offers custom aluminium extrusions designed to your exact specifications. Perfect for solar racking, mounting systems, or energy storage enclosures.

Services that streamline your manufacturing process.

At Capral, we understand solar projects rely on precision engineering, tight schedules, and dependable supply chains.

Capral's nationwide distribution footprint ensures reliable supply to your manufacturing facility, wherever you're located. With multiple distribution centres across Australia and dedicated account support, we work closely with your team to manage lead times, logistics, and changing demand.

Our in-house technical specialists are available to support your projects from concept to completion. Whether you're navigating compliance requirements, developing new

profiles, or looking to optimise materials usage, our experts can provide guidance tailored to playground construction.

We also offer project-specific fabrication services — including cutting, drilling, and punching — that reduce time and labour on your production line. These value-added services can help you improve speed, reduce waste, and increase installation accuracy in the field.

Flexible Ordering and Nationwide Delivery Options

Capral offers you multiple ways to conveniently source aluminium products and services tailored to your needs:

- Work directly with a **dedicated account manager** who can provide personalised support throughout your project, helping you select the right products and manage timelines
- Visit one of our local **Aluminium Trade Centres** for expert advice, product demonstrations, and fast pick-up.
- Our **online store** is available 24/7 for quick and easy ordering, allowing you to place orders anytime from anywhere. Capral's robust national distribution network ensures fast and reliable delivery direct to your factory or construction site nationwide.

Finishing Options That Fit Your Vision

A high-performance finish doesn't just protect — it elevates. Capral offers in-house powder coating through certified Dulux and Akzo Nobel applicators, giving you access to a wide range of architectural colours and finishes suitable for coastal and inland conditions alike.

Our powder coating services are available nationally and designed to support short lead times — ideal for fast-moving projects.

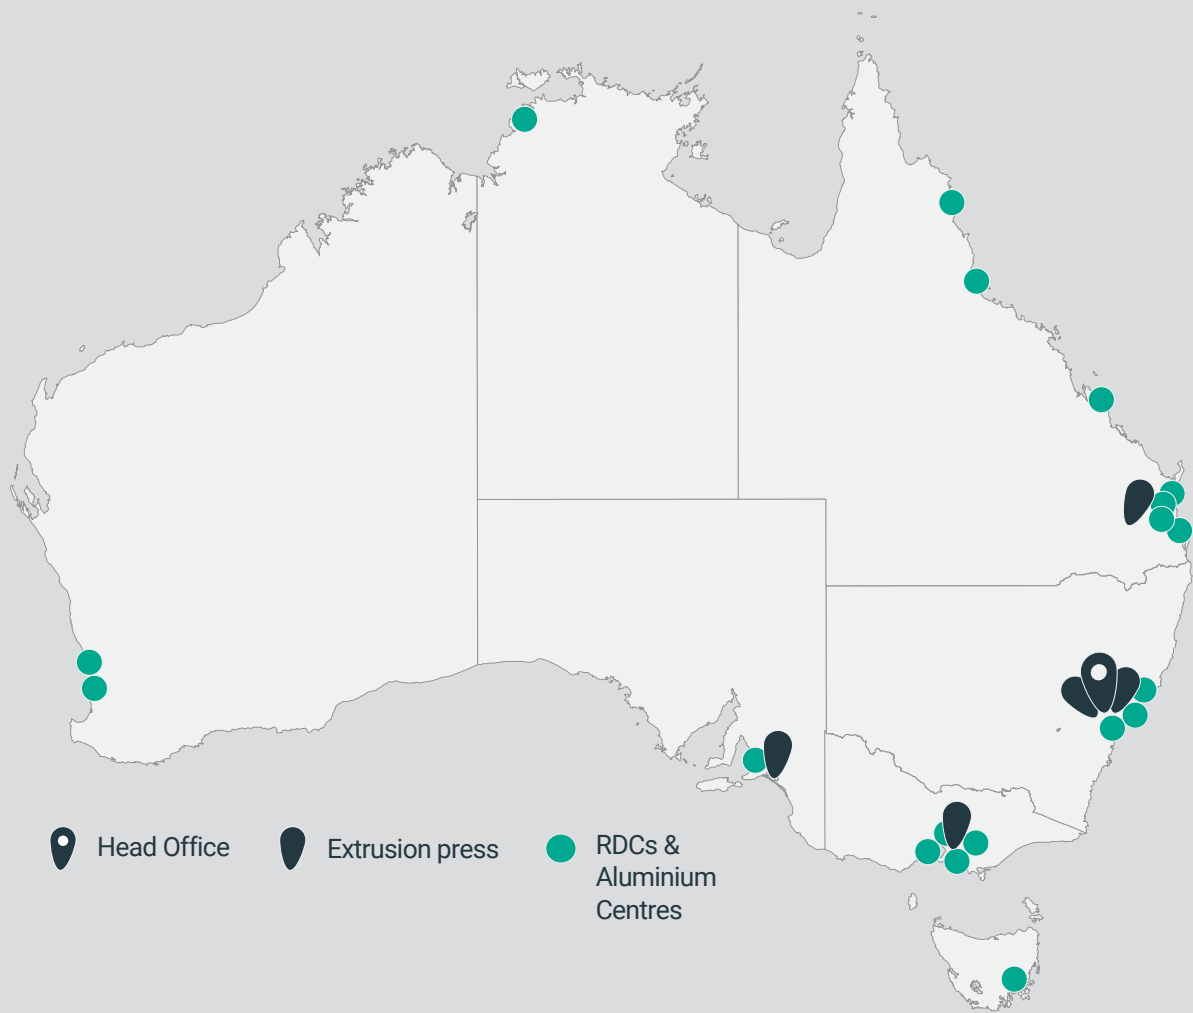

Whether you're aiming for bold colour statements or subtle tones that blend with the natural landscape, we can help you deliver a consistent, high-quality finish every time.

Value-Add Services That Streamline Production

Capral offers a range of in-house value-add services — including cutting, drilling, punching, and CNC machining — designed to support efficiency throughout your projects.

By delivering aluminium components pre-processed to your specifications, Capral helps to reduce on-site labour, minimise waste, and accelerate factory production timelines.

Our services are backed by national capability and consistent quality control, ensuring your materials arrive ready for integration.

Lower-carbon Aluminium with LocAl®

Capral's LocAl® range gives the industry access to aluminium with a significantly reduced carbon footprint without compromising quality or supply.

It includes two certified options for aluminum extrusions:

- **LocAl® Green:**
Under 8kg CO₂e/kg aluminium
- **LocAl® Super Green:**
Under 4kg CO₂e/kg aluminium

LocAl® enables you to specify lower-carbon aluminium while maintaining consistency across projects. It supports efforts to reduce embodied carbon, meet green certification targets, and align with growing sustainability expectations from clients and regulators.

Certified Sustainability with ASI

Capral is certified to both the ASI Performance and ASI Chain of Custody Standards, demonstrating our commitment to responsible sourcing and sustainable manufacturing.

This means access to aluminium that is ethically sourced, fully traceable, and aligned with global ESG best practices. ASI-certified materials support green building standards, ESG reporting, and increasing demands for transparency across the construction industry.

By choosing Capral, you're partnering with a supplier whose sustainability credentials are independently verified and whose materials support your project goals and reputation.

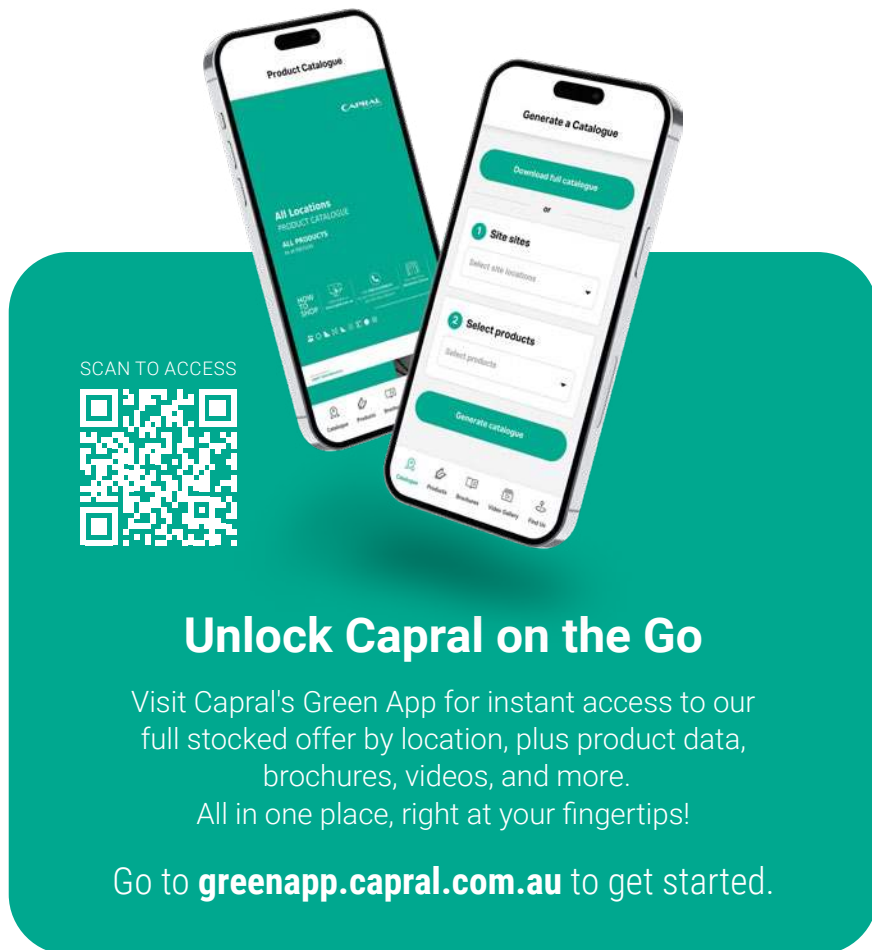

Australian-Made Extrusions

Capral proudly manufactures its aluminium extrusions right here in Australia, supporting local jobs, reliable supply chains, and consistent quality.

This means dependable lead times, reduced risk of delays, and confidence in compliance with Australian Standards.

Whether you are using standard profiles or custom designs, you can trust that every extrusion is made to perform backed by local expertise and national reach.
