

The background of the entire image is a close-up, low-angle shot of a silver aluminum dump trailer. The trailer's bed is raised, revealing its internal structure and the wooden floor. The side of the trailer shows rivets and structural reinforcements. Two wheels with black tires and silver rims are visible. A yellow strap is attached to the side of the trailer. The sky is blue with some light clouds.

ALUMINIUM SOLUTIONS FOR
TRAILER
MANUFACTURERS

Local expertise, quality aluminium, national support, and sustainable solutions. Everything trailer manufacturers need to build lighter, stronger, and more efficiently.

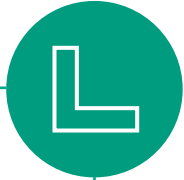

The trailer manufacturing industry demands materials that balance strength, weight, and corrosion resistance — and supply partners who understand the precision and reliability needed for performance on the road or water. At Capral, we've been supplying aluminium to Australian manufacturers for almost 90 years. Our local manufacturing footprint, dependable distribution network, and versatile product range make us a trusted partner for car and boat trailer builders nationwide.

Whether you're manufacturing heavy-duty transport trailers, lightweight boat trailers, or custom recreational designs, we deliver aluminium solutions that help streamline your build process — from chassis to finish.

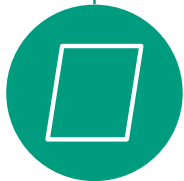

**Capral offers a wide range
of aluminium products,
stocked locally for the trailer
manufacturing industry.**.....

Standard Extrusions, Angles & Tubes

A wide range of stocked profiles — including angles, channels, round and square tubes — ready for immediate dispatch. Essential for trailer builds, offering strength, design flexibility, and ease of assembly.

Rolled Products

Aluminium sheet, plate, and coil, ideal for trailer floors, guards, cladding, and body panels. Lightweight, corrosion-resistant, and easy to fabricate.

Compliance & Safety

Capral's aluminium products are manufactured and tested to meet relevant Australian Standards, ensuring consistency, strength, and quality across every profile and plate.

Our in-house technical specialists can assist with design verification, compliance documentation, and guidance for applications requiring specific material grades or certifications.

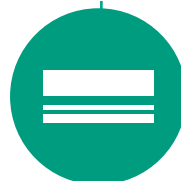

Surface Finishing Options

To enhance performance and appearance, Capral offers a range of finishing solutions including anodising and high-quality powder coating. These treatments provide added corrosion resistance, abrasion protection, and long-term durability.

Custom Extrusion Designs

Need something tailored? Capral offers custom aluminium extrusions designed to your exact specifications. Perfect for chassis rails, cross members, tie-down systems, or integrated lighting features.

DNV Certification

Capral can supply DNV-certified aluminium extrusions and rolled products, ensuring compliance with rigorous international standards for strength, safety, and sustainability. Trusted by the marine, transport, and industrial sectors.

Services that streamline your manufacturing process.

At Capral, we understand trailer manufacturing relies on precision, speed, and efficiency.

Capral's nationwide distribution footprint ensures reliable supply to your manufacturing facility, wherever you're located. With multiple distribution centres across Australia and dedicated account support, we work closely with your team to manage lead times, logistics, and changing demand.

Our in-house technical specialists are available to support your projects from concept to completion. Whether you're navigating compliance requirements, developing new

profiles, or looking to optimise materials usage, our experts can provide guidance tailored to playground construction.

We also offer project-specific fabrication services — including cutting, drilling, and punching — that reduce time and labour on your production line. These value-added services can help you improve speed, reduce waste, and increase installation accuracy in the field.

Flexible Ordering and Nationwide Delivery Options

Capral offers you multiple ways to conveniently source aluminium products and services tailored to your needs:

- Work directly with a **dedicated account manager** who can provide personalised support throughout your project, helping you select the right products and manage timelines
- Visit one of our local **Aluminium Trade Centres** for expert advice, product demonstrations, and fast pick-up.
- Our **online store** is available 24/7 for quick and easy ordering, allowing you to place orders anytime from anywhere. Capral's robust national distribution network ensures fast and reliable delivery direct to your factory or construction site nationwide.

Finishing Options That Fit Your Vision

A high-performance finish doesn't just protect — it elevates. Capral offers in-house powder coating through certified Dulux and Akzo Nobel applicators, giving you access to a wide range of architectural colours and finishes suitable for coastal and inland conditions alike.

Our powder coating services are available nationally and designed to support short lead times — ideal for fast-moving projects.

Whether you're aiming for bold colour statements or subtle tones that blend with the natural landscape, we can help you deliver a consistent, high-quality finish every time.

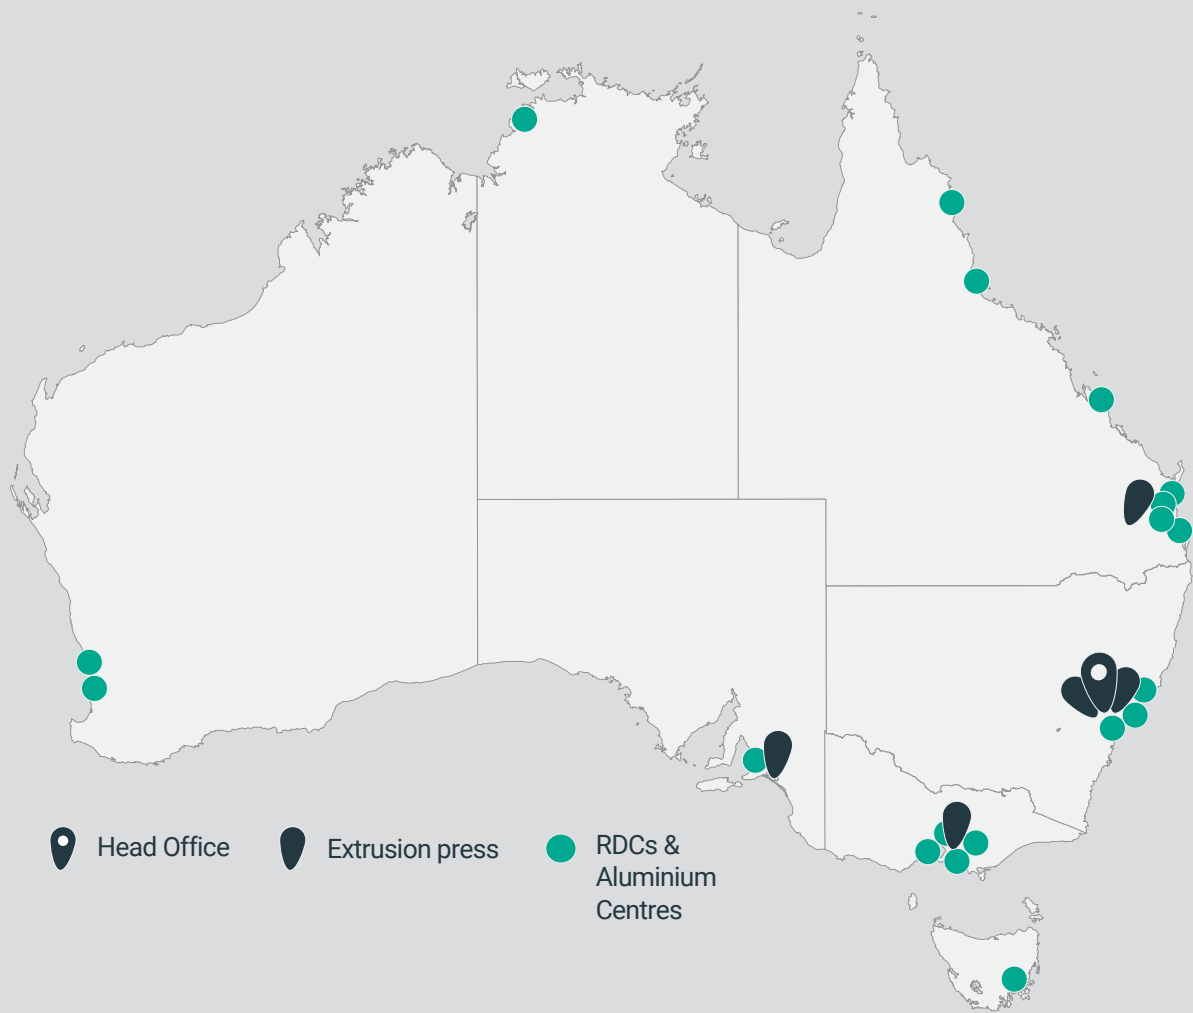

Value-Add Services That Streamline Production

Capral offers a range of in-house value-add services — including cutting, drilling, punching, and CNC machining — designed to support efficiency throughout your projects.

By delivering aluminium components pre-processed to your specifications, Capral helps to reduce on-site labour, minimise waste, and accelerate factory production timelines.

Our services are backed by national capability and consistent quality control, ensuring your materials arrive ready for integration.

Lower-carbon Aluminium with LocAl®

Capral's LocAl® range gives the industry access to aluminium with a significantly reduced carbon footprint without compromising quality or supply.

It includes two certified options for aluminum extrusions:

- **LocAl® Green:**
Under 8kg CO₂e/kg aluminium
- **LocAl® Super Green:**
Under 4kg CO₂e/kg aluminium

LocAl® enables you to specify lower-carbon aluminium while maintaining consistency across projects. It supports efforts to reduce embodied carbon, meet green certification targets, and align with growing sustainability expectations from clients and regulators.

Certified Sustainability with ASI

Capral is certified to both the ASI Performance and ASI Chain of Custody Standards, demonstrating our commitment to responsible sourcing and sustainable manufacturing.

This means access to aluminium that is ethically sourced, fully traceable, and aligned with global ESG best practices. ASI-certified materials support green building standards, ESG reporting, and increasing demands for transparency across the construction industry.

By choosing Capral, you're partnering with a supplier whose sustainability credentials are independently verified and whose materials support your project goals and reputation.

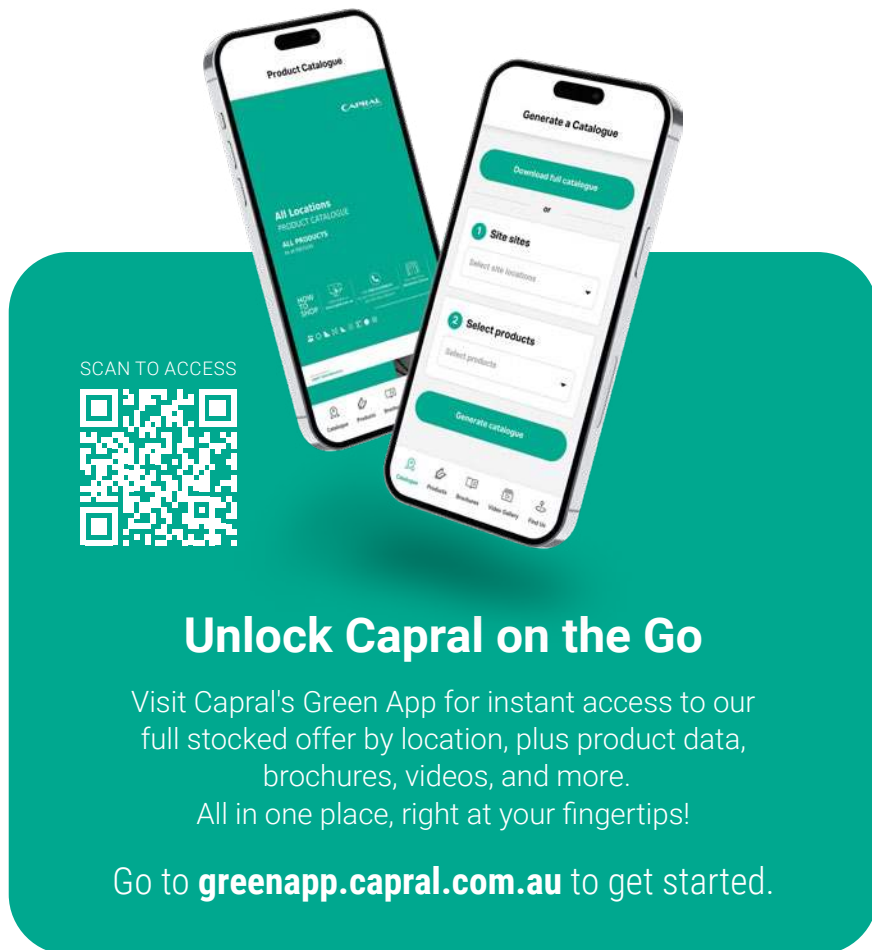

Australian-Made Extrusions

Capral proudly manufactures its aluminium extrusions right here in Australia, supporting local jobs, reliable supply chains, and consistent quality.

This means dependable lead times, reduced risk of delays, and confidence in compliance with Australian Standards.

Whether you are using standard profiles or custom designs, you can trust that every extrusion is made to perform backed by local expertise and national reach.
