S7 Screen

Effortless functionality with even greater protection from life outside.

SIGNATURE FEATURES

- Effortless fingertip operation for all door types
- Quick easy maintenance with removable covers
- Suits inside or outside applications including sill drainage

NEW FEATURES

- **Enhanced mesh engagement**
CenTrack™ continuous mesh engagement around the full perimeter delivers next-generation protection with exceptionally smooth and quiet operation.
- **Magnetic closing – no latch required**
Refined magnetic strip creates a cleaner meeting between screen stiles for a visually seamless finish.
- **Low profile 19mm sill**
A slim sill for the S7 screen allows it to be retrofitted alongside an existing door sill.

Screen

CONFIGURATIONS

The S7 Screen is perfect for smaller openings. It can be fitted to the inside or outside of the opening, so you can maximise inside-outside living to its full potential. The S7 Screen integrates seamlessly with new and existing french, folding or sliding doors, expanding Centor's premium range of stand-alone screening systems.

The screen is available in several configurations;

Single | A single screen that extends from one side of the frame and covers the full width of the opening.

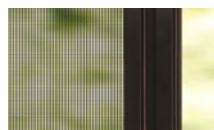

Double | Two screens which meet at any point along the opening.

XO or OX | A single screen that covers a sliding door opening and stops against the door handle. The second jamb is built into the far wall.

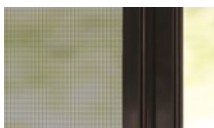

INSECT MESH

Insect mesh is available in two different weave styles to suit varying environmental requirements.

Standard Weave - Keeps insects like moths, flies and mosquitoes outside with durable polyester/PVC mesh construction.

Openness: 46%

Tight Weave - Made from the same durable material but features a smaller aperture to protect against tiny insects like midges. **Openness: 37%**

ALUMINIUM FRAME

Constructed from durable aluminium, the frame can be powder coated in one of our popular colours or customised to colour-match existing doors and windows. Sills are also available in natural or black anodised finish for greater durability.

Continuous engagement helps protect against insects and unwanted outside elements.

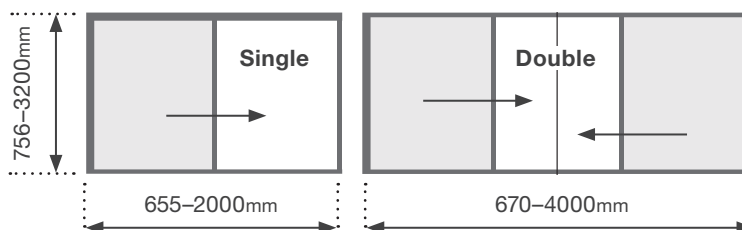

Quiet guide technology engineered for smooth, low-friction refined everyday operation.

19mm low-profile sill - Minimal visual impact with seamless floor integration.

FRAME LIMITS

Centor calculates frame limits to the millimeter for each configuration and fabric type. You can find the S7 frame limits as a general guide on the right.

TECHNOLOGY

The S7 screen builds on Centor's award-winning integrated load-balancing technology, delighting homeowners worldwide with smooth natural operation. Engineered for durability and ease of use, the S7 screen combines sleek aesthetics with advanced functionality, making it a standout choice for modern living spaces.

CenTrack™ - Patent Pending

S4 Retractable Screen & Blind

Also consider the S4 Screen for larger openings up to 4m tall and 9m wide. It offers blind fabrics for light control and privacy, along with jambless and corner configurations.

ABOUT CENTOR

With over 75 years of raising standards, and multiple product and innovation awards, Centor believes in better connecting people to their beautiful world outside through elegant, screens and hardware systems; designed to delight, without compromise.

Today, Centor's world leading Screen Systems define the ultimate luxury living experience in over 100,000 of the world's most beautiful homes. Centor has staff in 10 time zones worldwide, with manufacturing in four production plants in Brisbane (AU), Nanjing (CN), Chicago (US) and Łódź (PL).
